PROFILE

I am an enthusiastic and self-motivated aspiring web developer with hands-on experience in building projects using React. Currently transitioning toward full-stack development with the MERN stack (MongoDB, Express.js, React, Node.js). I have a basic understanding of MERN technologies and am actively expanding my skills through self-study and practice. Passionate about creating responsive, user-friendly web applications and eager to gain real-world experience

WORK EXPERIENCE

Internee.pk   JUNE 2025-AUG 2025

React Developer Intern

- Redesigned the company's official website using React, enhancing UI/UX and code modularity.
- Implemented Firebase Authentication with multiple login methods (email/password, Google), secure password management, and role-based routing.
- Used Redux Toolkit to manage and integrate application state across multiple components.
- Integrated RESTful APIs using Fetch, while handling loading and error states to improve user experience.
- Developed a responsive portfolio website using advanced CSS media queries for mobile-first compatibility.
- Deployed projects live via Vercel and shared code on GitHub, demonstrating end-to-end development experience.

PROJECTS

- Internee.pk Website Redesign
- API Data Fetching App (Flavoro Food App)
- Responsive Portfolio Website
